

Release Notes OfficeMaster Suite Version 9.0.1

[As of Juli 21, 2026]

The new minor release update for the OfficeMaster Suite includes fixes, stability improvements, and changes based on customer feedback. The following changes were made:

Security fixes

Implementation of a new Go compiler resolves the following issues:

- CVE-2025-61726 (net/url)
- CVE-2025-61730 (TLS 1.3 handshake via net/url and crypto/tls)
- CVE-2025-68121 (crypto/tls)

New JavaScript library resolves the following issues:

- CVE-2024-47875 (mXSS issue)
- CVE-2025-26791 (mXSS issue)
- CVE-2026-41239 (syntax issue)
- CVE-2024-48910 (prototype issue)
- CVE-2024-45801 (nested HTML issue)
- CVE-2026-41240 (HTML Tag Inconsistencies)

Corrections in the internal web server modules resolve the following issues:

- The Content Security Policy (CSP) does not define one of the directives for which there is no fallback option. The absence/exclusion of this directive is equivalent to allowing everything.
- Additional CSP headers have been implemented. CSP provides a set of standard HTTP headers that website operators can use to declare permitted content sources that browsers are allowed to load on the respective page. The covered content types include JavaScript, CSS, HTML frames, fonts, images, and embeddable objects such as Java applets, ActiveX elements, and audio and video files.
- The web server responses did not provide protection against clickjacking attacks. This has been corrected by the "frame-ancestors" or X-Frame-Options directive.

Microsoft 365® / Exchange Online Connector (msxbscgate)

Fixed Bugs

- Drain mode issues (#6977)
- MSX2KGATE installation fails (#6974)
- The MMC no longer displays user properties during a native M365 installation (#6963)
- Incoming fax/NGDX to a distribution list is only delivered to the Postmaster (#6937)
- Exchange Management Console crashes in version 9.0.1-9 (#6925)
- SMTPRX is installed unnecessarily during Hybrid Connector installation (#6921)
- Priority sending with Exchange Hybrid does not work correctly (#6920)
- OfficeMaster Exchange Management Console reads the email address instead of the UPN (#6918)
- Component does not start when connected to Exchange on-premises (#6894)
- Passwords in finstallhelp.log during the installation of an on-premises connector (BCS) are no longer stored in plain text (#6948)
- The path to connectorconfiguration.cfg cannot be edited (#6955)

Exchange 2013-2019/SE On-Premises Connector (msx2kgate)

Fixed Bugs

- Installation of MSX2KGATE fails (#6974)
- The installation wizard does not write a more detailed log (#6947)
- Incoming fax/NGDX to a distribution list is only delivered to the Postmaster (#6937)
- Incomplete Smart Host in Sender Connector (msx2kgate) (#6610)

DirectSIP component (directsip)

Fixed Bugs

- Diversion information from the invite is not correctly evaluated/used (#6941)

Rich Communication Services (rcs)

Fixed Bugs

- Messages are not delivered if more than one recipient is specified (#6909)

IamMail (iammail)

Fixed Bugs

- License inconsistency in OMS 9.0.1 (#6923)

Mail Gateway (mailgw)

Fixed Bugs

- Issue with SSL validation in the SpeechAI Converters (sttconv/ttsconv) (#6929)

Web API Component (webapi)

Fixed Bugs

- Documentation not retrievable - CSP Header (#6981)

SMTP Receive Component (smtprrx)

Fixed Bugs

- Attachment format not recognized (#6944)

Transfer Log Database (logdb)

Fixed Bugs

- Crashes after OMS8 to OMS9 update (#6919)

Syslog Component (syslog)

Fixed Bugs

- Diversion information from the invite is not correctly evaluated/used (#6941)

Authentication Gatekeeper (gatekeeper)

Fixed Bugs

- Web API documentation not retrievable - CSP Header (#6981)
- Server reports HTTP 200 (OK) despite reaching the 20s Timeouts (#6907)

Config Proxy (cfgproxy)

Fixed Bugs

- LogDB crashes after OMS8 to OMS9 update (#6919)

OfficeMaster Speech AI

Fixed Bugs

- SSL verification issue in SpeechAI converters (sttconv/ttsconv) (#6929)
- License inconsistency in OMS 9.0.1 (#6923)

General

Fixed Bugs

- Components still report a drain alarm after restart despite successful startup (#6983)
- "Apply" button disabled after service account password change (#6953)
