

Release Notes OfficeMaster Suite Version 9.0.2

[As of September 30, 2026]

The new minor release update of the OfficeMaster Suite includes fixes, stability improvements, and changes based on customer feedback. Specifically, the following changes have been made:

Third-party security fixes

- Use of the latest Golang compiler
- Use of the latest Chromium browser for centralized conversion
- Use of a current ImageMagick program for centralized conversion
- Use of the latest Java Development Kit
- Use of the latest Keycloak version for local user management
- Use of the latest MariaDB database software
- New JavaScript library in the internal web server references
- The Content Security Policy (CSP) does not define one of the directives for which there is no fallback option. The absence/exclusion of this directive is equivalent to allowing everything.
- Additional CSP headers implemented. CSP provides a set of standard HTTP headers that website operators can use to declare permitted content sources that browsers are allowed to load on the respective page. The supported content types include JavaScript, CSS, HTML frames, fonts, images, and embeddable objects such as Java applets, ActiveX elements, and audio and video files.
- New SSL library for encrypted communication (OpenSSL)
- Use of the latest character set conversion library (ICU)
- The internal libraries for various processes (TIFF, JPEG, and PNG conversion, PCRE regular expression library, etc.) have been updated.

Microsoft 365® / Exchange Online Connector (msxbcsgate)

Fixed Bugs

- BCS Connector (Hybrid / O365) does not retrieve outgoing emails (faxes) from the transfer mailbox if they are digitally signed (#7032)
- During offline installation of the Hybrid / O365 Connector, the Application ID and Secret are not saved in the connectorconfiguration.cfg file (#7013)
- Connector crashes unexpectedly (#6990)
- Component viewer displays the error "(Temporary Error) Default Recipient is not defined!!!" even though neither fax nor SMS reception is enabled (#6908)

Exchange 2013-2019/SE On-Premise Connector (msx2kgate)

Fixed Bugs

- Component stops every few seconds due to corrupted job files (#7015)

Command Converter (cmdconv)

Fixed Bugs

- Problem with MHT to PDF conversion (#6999)
- Problem with PCL conversion (#6668)
